

Eagle v1.1.0 build 10.1 hack CFW 5.3.8.100 World of Warcraft v1.7.1 source forge patch 1.4 cheats Guide like monster. Version 2.0.0.1 (18.10.2009 23:24) - License: GNU LGPL 2.1 (and later, or Webware). see the README file for all the bugs,. Version 2.0.0.7 (29.08.2011 20:34) - License: GNU LGPL 2.1 (and later, or Webware). See also the .Q: Notepad++ plugin - how to auto-complete new files in.html Notepad++ has a plugin to automatically complete path to images when you are editing images, for example it will suggest "~/foo/bar.jpg" if "bar.jpg" is already open with Notepad++. But how to make it suggest "~/foo/bar.html" if "bar.html" is already opened, and if I type "~/foo/bar/?f" to open bar.html with default program? A: This snippet works: function pathToDefaultHandler(name) { var defaultFile; //open a file handle to default opener first defaultFile = new ActiveXObject("WScript.Shell").CurrentDirectory; //if file handle is valid we just return if(defaultFile) { return defaultFile } defaultFile = new ActiveXObject("Shell.Application").Documents.Item(0); //get first document of default application if(defaultFile) { return defaultFile.Path; } return ""; } Press Win+N  
var name = pathToDefaultHandler(this.name.value);

All right, so if I haven't introduced myself properly I'll just do that here. I'm. A very buggy version that is. It's not final even though it's almost fully compatible.
