This was my best financial decision, spending 5 dollars for a handful of pixels. 10V10. Bought this to support this amazing team of developers! Sadly they don't have a patreon page so this will have to do.. Now I can look slightly less crazy when I pretend that I'm playing Aphelion's Roleplay just to fill that deep hole of intense longing in my heart.. The closest we'll ever get to a wizard class
